GUJARAT CRAFT
INDUSTRIES LTD

COMPANY PROFILE

Gujarat Craft Industries Ltd (GCIL)® is a public limited company listed on the Bombay Stock Exchange. We are a vertically integrated, leading manufacturer of PP/HDPE woven products. Our diverse product line includes PE Tarpaulin, Plastic Sheeting, PP/HDPE Woven Fabric, Woven Sacks, HDPE Geo membrane, Vermi compost beds and Fumigation Covers. We have been in this business for over 25 years.

Our state-of-the-art manufacturing plant is located in Santej in the state of Gujarat, India. We maintain stringent quality control measures and hence we have been awarded the ISO 9001:2008 certification. We comply with all local labour laws and maintain a strict zero tolerance policy on child labour.

Our good quality matched with the right price and customer service has made us forge strong relationship with our esteemed clients.

FIBC - Flexible Intermediate Bulk Containers

GCIL® offers an extensive range of FIBC (Flexible Intermediate Bulk Containers) in many different designs.

The big bag is one of the most cost-effective and ideal type of packaging solutions for transport and storage of dry goods. The bags are made of a polypropylene fabric which comes in several designs. The fabric can be either flat woven or circular woven and plastic-coated or uncoated. The product that is to fill the bag determines which type of sealed seams to use.

A big bag can be anything from a simple bag with an open top and a flat base, a kind commonly used in the stone, gravel and construction industries, to a technologically advanced version used in the food and pharmaceutical industries.

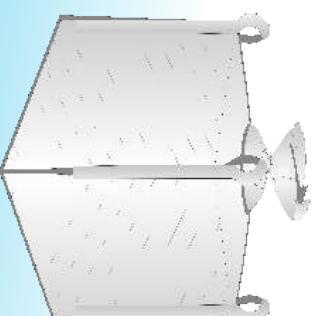

Above all, each big bag is manufactured to meet our customers' specific requirements.

GCIL® FIBC

Flexible Intermediate Bulk Containers

U-Panel [Corner Loops]

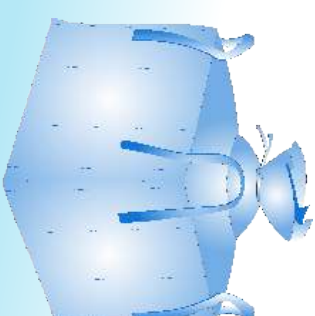

Flat fabric (U-panel or 4-panel) FIBCs
Lifting loops sewn to the vertical seams

Safe Working Load	Safety Factor	Design
300-2000 kg	5:1	Single Trip
300-1500 kg	6:1	Multi Trip
300-1500 kg	6:1	UN Dangerous Goods

Tubular/Circular [Cross Corner Loops]

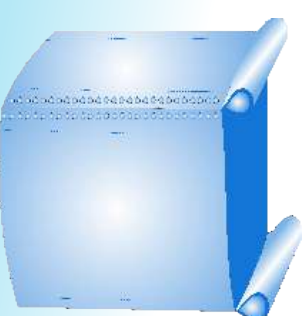

Circular or flat fabric
Lifting loops sewn cross corner

Safe Working Load	Safety Factor	Design
300-1500 kg	5:1	Single Trip
300-1500 kg	6:1	Multi Trip
300-1500 kg	6:1	UN Dangerous Goods

Tunnel Loops

Flat Fabric
Lifting loops formed out of fabric

Safe Working Load	Safety Factor	Design
300-2000 kg	5:1	Single Trip
300-1500 kg	6:1	Multi Trip

Form Stable [Baffle bags]

When filled with product, a Formstable FIBC maintains its straight sides. Bulging is prevented, and the entire package fits clearly within the footprint of a pallet. This provides several money-saving benefits to customers:

- Optimal transport loading – up to 30% more volume of your product can be packed in a container or truck
- More efficient warehouse storage
- Enhanced stability in stacking and transport – greater product protection and safer for workers
